

Dr. Yadro Ducic
Aesthetic and Reconstructive
Surgery Associates
Colleyville, Texas
Fort Worth, Texas
Dallas, Texas

ASK DR. DUCIC

HOW WOULD YOU CHARACTERIZE YOUR OFFICE ENVIRONMENT?

It's luxuriously appointed, welcoming patients with a warm Mediterranean décor of stucco and a red tile roof to convey a comfortable ambience and sophisticated Old World elegance.

WHY IS AMBIENCE SO IMPORTANT TO YOU?

It sets the backdrop for a beautiful patient experience from start to finish and conveys my appreciation for aesthetics on many levels.

WHAT IS THE MAIN AGENDA FOR YOUR PRACTICE?

We strive to make everyone feel at home, like they are part of the family because that is what we are—a cohesive group united by the desire to help patients reach their goals.

The choice is yours

When choosing a facial plastic surgeon, Dr. Ducic suggests relying on someone with a strong track record and years of experience. "I'm a perfectionist in all aspects of my life, and by extension, the same is true when it comes to my patients' faces." Having published more than 100 articles and book chapters and having taught at numerous courses and universities, Dr. Ducic feels it is important to remain mindful of both proven techniques as well as those that are on the horizon. "My goal is to seamlessly integrate traditional methods of treatment with new surgical and noninvasive techniques," says Dr. Ducic, who believes in researching a surgeon to make sure you both share the same views, goals and ideas about what procedure is right for you. "People approach cosmetic surgery with different perceptions of beauty, so knowing that you and your surgeon agree on how to best achieve your goals is very important."

NECK-LIFTING TECHNIQUES

HOW CAN I TREAT A SAGGING NECK?

Neck laxity develops over time in most people. Weight fluctuations, certain skin types and excessive sun exposure hasten the process. Some patients are well served with simple liposuction. Others may require neck lifting to resuspend the tissues in a more aesthetic fashion. Having performed and written articles on liposuction and neck-lifting techniques, I would be happy to help you determine what the best technique is for your individual case.

“helping others is my passion”

WITH 14 YEARS OF EXPERIENCE TO HIS CREDIT, DR. YADRO DUCIC BELIEVES THAT FACIAL PLASTIC SURGERY SHOULD GO UNDETECTED. "IN MY OPINION, PEOPLE SHOULD NEVER KNOW YOU HAD WORK DONE," HE SAYS. "IT SHOULD BE OUR LITTLE SECRET AS TO WHY YOU LOOK SO GOOD."

ABOUT DR. DUCIC

WHAT IS YOUR FAVORITE PART OF YOUR JOB?

Following up with patients long-term and seeing how happy they are with their results is very exciting.

WHAT IS THE BEST ADVICE YOU'VE RECEIVED?

Treat every patient like a member of your family—with respect, appreciation and genuine concern for their well-being.

WHAT FASCINATES YOU MOST ABOUT THE HUMAN BODY?

Its capacity to heal.

HOW DO YOU GIVE BACK TO YOUNGER GENERATIONS?

I share my knowledge by contributing to publications, discussing new techniques and new ways of performing procedures. I also train residents from the University of Texas Southwestern Medical Center and am a fellowship director for the American Academy of Facial Plastic and Reconstructive Surgery.
