# REFRESH RENEW AND RESTORE NATURALLY

By

**DR. YADRO  
DUCIC**

CENTER FOR AESTHETIC SURGERY  
DALLAS / FORT WORTH, TEXAS

# U

sing a wide array of options to treat his patients' facial aesthetic concerns, Dr. Yadro Ducic is committed to ensuring his patients are satisfied with their natural-looking results. For facial rejuvenation, Dr. Ducic employs fat transfer for a naturally refreshed appearance. "We not only develop loose or lax skin as we age, but we also lose volume in our midface and cheeks. This gives a drawn or haggard appearance," says Dr. Ducic. "Fat transfer works really well to rejuvenate the face and restore lost volume where needed. It's easy to harvest and inject, has minimal side effects, and 80 percent of my patients retain some or all of their transplanted fat."

“

*I want my patients to look rejuvenated, refreshed and very natural.*

## WHO I AM

1.

### HOW ARE YOU HELPING TO ADVANCE THE FIELD AT LARGE?

We continue to expand on many techniques we have developed for all aspects of facial reconstructive surgery, which can truly change the lives of patients affected by tumors and traumatic injury

2.

### WHAT NEW SERVICES ARE YOU EXCITED TO OFFER?

The NeoGraft® hair transplant technique for eyebrows delivers much more natural-looking results than tattoo or microneedling

3.

### WHY IS GIVING BACK SO IMPORTANT TO YOU?

We can all give back, no matter what we do. There is always someone less fortunate than ourselves and we must always remember that someone could be any of us if our own circumstances were changed

4.

### WHAT DO YOU DO TO PROVIDE THE SAFEST ENVIRONMENT FOR YOUR PATIENTS?

All surgery is supervised by an anesthesiologist in a certified large surgery center. In-office surgery centers simply can't have the redundant staffing and safety features built in as large surgery centers naturally do

5.

### WHAT ONE SURGICAL ADVANCEMENT ARE YOU MOST EXCITED ABOUT RIGHT NOW?

In revision rhinoplasty, and in some primary rhinoplasties, there is often a need for cartilage grafts when not enough is found in the septum. We developed a technique, which we have published, on partial thickness rib graft harvest in these patients that minimizes the donor site pain and deformity often seen within traditional rib graft techniques

### A New Expression

This 70-year-old patient said people often wrongly assumed she was angry or tired. Dr. Ducic performed an endoscopic browlift and an upper blepharoplasty to give her eyes a more relaxed expression.

### THREE WORDS THAT BEST DESCRIBE ME

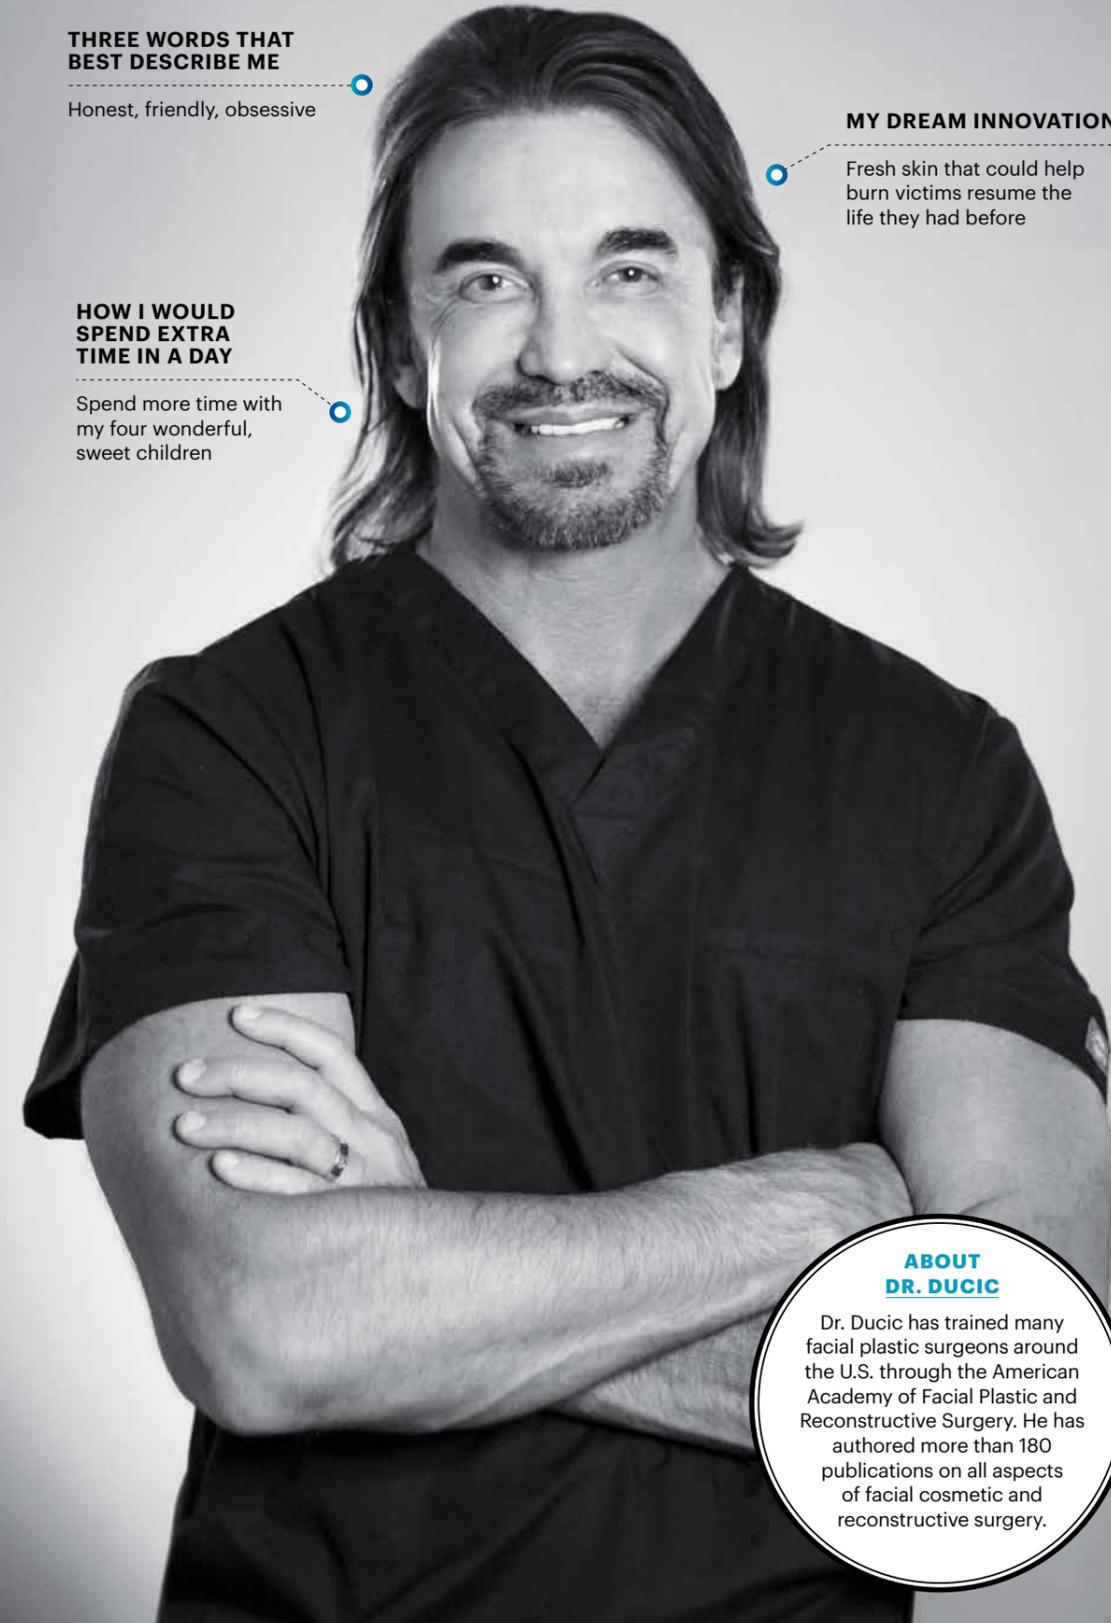

Honest, friendly, obsessive

### MY DREAM INNOVATION

Fresh skin that could help burn victims resume the life they had before

### HOW I WOULD SPEND EXTRA TIME IN A DAY

Spend more time with my four wonderful, sweet children

### ABOUT DR. DUCIC

Dr. Ducic has trained many facial plastic surgeons around the U.S. through the American Academy of Facial Plastic and Reconstructive Surgery. He has authored more than 180 publications on all aspects of facial cosmetic and reconstructive surgery.
